SUMMARY

I am a forward-thinking software engineer with over 2 years of experience developing and implementing cutting-edge software solutions to boost business efficiency. I am extremely skilled at managing projects from start to finish, including conception, development, and delivery, and in all aspects of the software development lifecycle. I am very adept at managing multidisciplinary teams in a fast-paced, deadline-driven setting to ensure timely project completion within budget constraints.

EXPERIENCE

Full Stack Developer

Freelancer

12/2021 - Present Remote

- I participated in the development of various projects with a team.
- Developed websites using various frameworks and programming technologies, including PHP, MySQL, CSS/HTML, Javascript, Databases, JQuery, React, Node.js/Express, Codelgniter, and Laravel.
- Hands-on experience using cPanel, phpMyAdmin, DNS records, and other various aspects of web servers such as Addon domains, email, FTP, and SSL.
- Hired and directed multiple full-stack developers, working to establish key systems in the business.

Data Science Intern

Glowing Soft Technologies

07/2023 - 09/2023 Remote

- Engaging in real-world data science projects, honing my data visualisation, statistical analysis, and analytical problem-solving expertise.
- Collaborating with seasoned data professionals and gaining insights into industry best practices and emerging trends in data science.
- Using Python and different libraries to develop data applications and solutions that provide actionable insights.

Full Stack Developer

Kaspar Consulting Services

02/2022 - 11/2022 Remote

- Collaborating with 3+ agencies, we developed websites for clients in the food delivery, entertainment, and logistics industries.
- I worked on TELA software. A telecommunication product to benchmark network data in South Africa and Pakistan.
- Developed full-stack web applications that processed, analysed, and rendered data visually.

Web Developer

Constantine PR & Communications

08/2021 - 03/2022 Islamabad, Pakistan

- Designed and optimized user-friendly applications, boosting website conversion rates and customer satisfaction.
- I worked with a team of four web developers to develop innovative systems that will help each section save both man-hours and manpower.
- Mobilized and optimized client applications for compatibility across devices, ensuring exceptional performance.

Web Developer

Infology Solutions

02/2021 - 08/2021 Islamabad, Pakistan

- 70% of increment in skills like computer maintenance, web application development, web design and increased my programming skills.
- Created and maintained 5+ web applications for numerous national and foreign clients.
- Facilitated launch of new corporate website, increasing web traffic by 32% over year prior.
- Utilised creativity and technical expertise to craft simple and fun games.
